

INŠTITÚT  
ZAMESTNANOSTI

# *Inštitút zamestnanosti* *(Employment institute)*

non-gouvernement non-profit organization based on studying problems of employment.

- collects informations about labour market to be a platform of information exchange.
  - focused on slovak labour market in the sense of its differences by the region, age, qualification an so one.
  - solves problems of activ labour market policies, life-long learnig, middle and log term strategies and prognoses focused on regional differencies.
- 
-

# Partners

## SAV (Slovak Academy of Science)

- leading organization in research and development in Slovakia, financed by the state

## Labour Offices (in Bratislava and Lučenec)

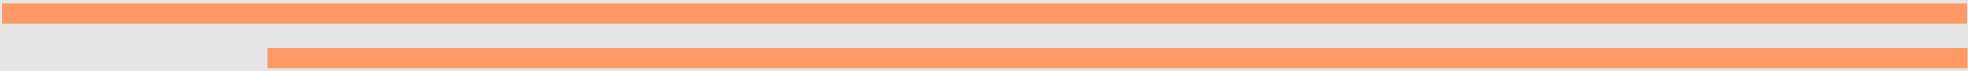

- link between unemployeed and employers
  - steering and distribution state support (money) for unemployeed and for people in social problems
  - providing (mediation) activity of active labour market policy (requalification, after school practise, “activate” work)
  - based and financed by state government from state budget
- 
-

# *Objectives*

First project objective:

Creating regional prognoses about labour market for pilot regions.

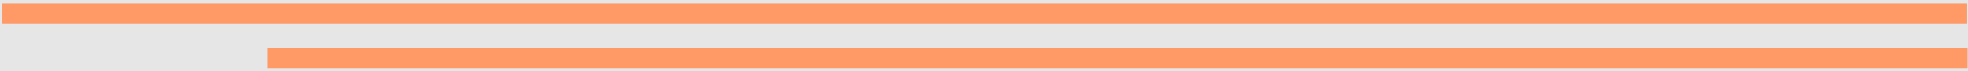

These prognoses will be based on research of Institute of Slovak and World Economy and will be completed with information from regions in cooperation with Labour Offices.

# *Objectives*

Second project objective:

Creating manual and expert system for effective selection of activities of active labour market policy and ways of preferring it before less active methods

# Objectives

Third project objective:

Supporting the development of Employment Institute, which will process and update the manual and expert system. It will also obtain other necessary data for creating updated manuals with the help of regional colleagues in their network. Employment institute will continue in its work in creating regional prognoses and manuals also for other regions after project closure. The manual is the expert system, which will enable to search for suitable active labour market policies (re-training).

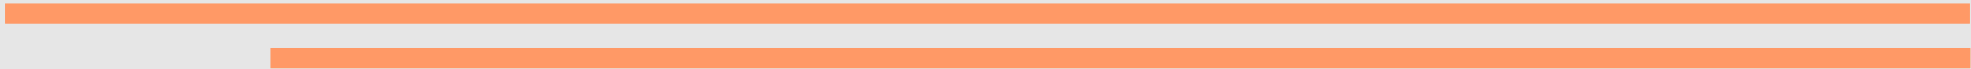

---

---

# *Target group*

-primary: unemployed persons in region  
Lučenec without focus on special groups,  
perhaps long term unemployed

-other regions will be processed in the future

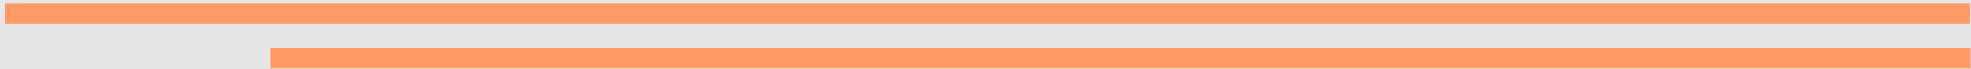

# Activities

- creating regional prognoses about labour market for pilot regions (Lučenec, Bratislava)
  - creating expert system for distributing active labour market policy based on prognoses and region demand
  - expert system will be helpful instrument for communication between department in LO and help for junior LO staff with lack of experience
- 
-

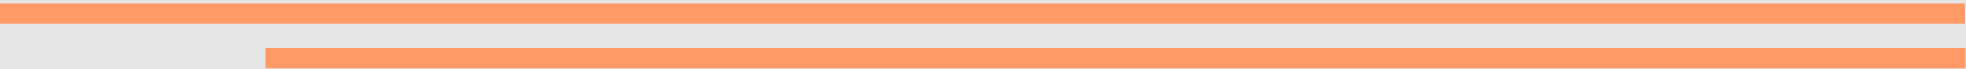

# *Result/Evaluation*

- goal is to decrease unemployment in region.  
(We have an estimate for unemployment rate till 2013 made by SAV, based on past economic results and actual trends)
- improve the communication inside LO to provide better and efficiently link between offer and demand on labour market

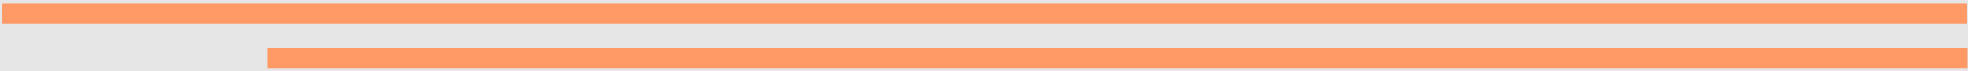

# *Context to SR*

- project gives the advise to unemployeed to the best requalification course to do and in this sence it may convince people to improve the skills obtained in course
- project increase the effectivity of funding requalification courses and improve possibility to join labour market

# *Crucial point expected*

- transform knowledges and good experience with decision of active labour policy (re-training) to expert system
- good implementation of decision proces at LO will be key to succesfull and usefull expert system

# *Adaptability and possibilities of transfer*

- assumption transfer between the region of Slovakia
- possibility of transfer expert system will be known after testing in slovak region
- necessary to know needs and possibility of region
